**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Summit gales easing through the morning. Noticeable chill effect on summits despite the mild temperatures.

Forecast for Monday 02 Dec 2024

Weather: Cloud and outbreaks of rain, turning to sleet and snow on higher summits, clearing towards midday to leave a brighter afternoon with a few wintry showers. The showers dying out by evening with long clear spells developing.

Maximum wind: Westerly or southwesterly 15-20mph veering more northerly 20-25 mph by midday, then easing in the afternoon.

Chance of cloud-free hill tops above 800m: Little chance at first but improving to 75% from midday

Low Cloud and visibility: Periods or persistent cloud 450-600m becoming occasional above 600-750m from midday. Away from cloud visibility good falling several kilometres in rain and wintry showers and perhaps a kilometre or so in summit snow.

Temperature: **Valleys:** Around plus 6 or 7 Celsius at dawn rising to 9 Celsius by day, falling close to zero in evening
At 800m: Around plus 4 Celsius falling steadily to minus 1 Celsius through the day
Freezing level: Above the summits gradually falling to 600m
